

Rugged and durable next-generation firewall, with outstanding performance and scalability

FEATURES AT-A-GLANCE

- Cost-effective next-generation firewall for harsh environments, housed in an industrial rugged design form-factor (DIN mount included)
- Next-generation firewall services, including Clavister True Application Control, Clavister Content Security Services and User Identity Awareness
- Powerful stateful firewall with deep-packet inspection gives you a high level of security
- Flexible, dynamic routing and connectivity with support for link aggregation
- Built-in support for both IPsec and SSL
 VPN offers easy to use remote connectivity
- Centralized Security Management System included free-of-charge in the Clavister Security Subscription package
- High-end network infrastructure, such as traffic management, High Availability (HA), server load balancing and WAN load balancing, are all included with Clavister Subscriptions
- The perfect for industrial environments, offshore installations and other demanding environments

The Clavister X8 is targeted for installations where standard security products cannot function reliably. With its industrial, rugged design, the durable Clavister X8 can withstand harsh, industrial environments and deliver outstanding solid performance, offering unified security management between office environment and industry environment. The Clavister X8 is perfect for tough environments, such as remote industrial locations and other demanding environments where high-end security is required.

Next-Generation Firewall Services

True Application Control

Clavister X8 fully supports True Application Control – one of our next-generation firewall security services.

Enabling True Application Control will help you to manage applications used in your network more safely. With added security you lower your overall risk exposure and as a result, costly security incidents and downtime can be avoided. It also gives you valuable insight in which applications are used by which user, and can therefore prioritize business critical application and increase your overall business productivity.

True Application Control not only recognize more application and data, it understands how these application behave and can act immediately on malicious behavior.

With its unique support for Deep Application Content Control (DACC) technology, our application control can perform in-depth analysis and control of application content with higher degree of control. DACC enables you to understand and visualize Skype IDs, SQL queries, Facebook chat text, VoIP call information and much more.

Connectivity Choices

The Clavister X8 is equipped with four 1GbE (RJ45) connectors. You can freely assign these ports as you need for ultimate flexibility.

Clavister X8 also support link aggregation, which means that you have the added benefit of maximizing throughput and increase the resilience of your system.

Although the Clavister X8 lacks a dedicated High Availability port, it has full support for High Availability.

RADIUS Relayer - Pinpoint Security

Clavister X8 includes support for RADIUS Relayer, which can provide user information and DHCP IP provisioning for RADIUS-based authenticated users.

For example, when a user roams over from a cellular network to an Enterprise Wi-Fi network for data access. This is useful as it allows for granular user and group-based policing of traffic and controlling access to network resources.

Advanced Routing

The Clavister X8 provide an advanced routing engine, including Policy-Based Routing, with seamless route failover. This allow for Dynamic Policy-Based Routing where traffic can be routed based on dynamic events, such as User Identity, latency, HTTP Get responses, etc.

This enable you to create truly flexible and sophisticated policies that reflect the true requirements of your network.

Clavister SSL Inspection for Application Control provides a high performance and non-intrusive way to identify and control even SSL encrypted applications.

True Application Control is included in the Clavister Security Subscription (CSS) service.

Content Security Services

Having a regular firewall is not enough to prevent attacks from happening on your network. As attacks become more severe and the threat land-scape becomes more dynamic, additional measures need to be in place to protect your network. Clavister offers best-of-breed content security services, including Intrusion Detection and Prevention System, network-centric Anti-Virus from Kaspersky Labs, and Web Content Filtering to add an additional security layer to your firewall. These content security services protect your network from advanced threats your firewall alone cannot stop. The Content Security Services are included in the Clavister Security Subscription (CSS) service.

User Identity Awareness

User Identity Awareness (UIA) provides granular visibility of user identity, and enables you to control network access at the user level. The User Identity Awareness together with our True Application Control functionality will provide you with an extremely powerful and versatile tool for granular visibility and control of "who-does-what-and-when" in your networks. You will have the ability to pinpoint user access to applications across both wired and wireless networks regardless of connecting device.

True Security Values

Clavister Subscriptions

We believe our customers should have choices. We also believe you should have it all. Therefore we offer you a choice between our comprehensive Clavister Product Subscription (CPS), or our all-inclusive, full service option, Clavister Security Subscription (CSS).

Clavister Product Subscription

The Clavister Product Subscription contains a high number of product service, such as software updates, centralized management support and flexible service plans.

CPS includes a hardware replacement service to offer you the best possible protection in case a hardware failure should occur. Finally to ensure you get the best out of your Clavister security gateway, we provide you with around-the-clock support from our award-winning technical support team – your dedicated resource with highly skilled engineers that help you out in case of need. The Clavister Product Subscription keeps your Clavister updated, online and ready for business twenty-four-seven.

Clavister Security Subscription

Clavister Security Subscription is a complete, all inclusive suite of product services. It contains all the services you get with Clavister Product Subscription, but extends the service offering by including a full set of next-generation firewall services, such as Clavister True Application Control, Web Content Filtering, Anti-Virus and Intrusion Detection and Prevention (IDP).

CSS offers best-in-class content services, which protect you from the more advanced types of malware and exploits. It grants you access to the latest software and signature updates keeping your infrastructure up to date and increasingly more stable and secure.

All Clavister Subscriptions are available in 12, 24, 36, 48 and 60 months service terms, offering you maximum security and flexibility.

For more information about Clavister Subscriptions, see the separate Clavister Subscriptions brochure.

True Flexibility - Get more performance when you need it

Clavister X8 is available in two models, each addressing specific customer requirements. Should your performance needs increase, Clavister offers you the flexibility to upgrade to a more powerful Clavister X8 without having to invest in new hardware. Just simply order the upgrade to your preferred Clavister X8 model and install the new license file. It is as simple as that.

This makes Clavister X8 a low risk choice in dynamic business environments where requirements can change overnight. Clavister provides you the performance when you need it, avoiding high up front investment costs to your security infrastructure or having to worry about costly upgrades.

Uptime Technologies

Clavister X8 comes with powerful features to ensure that your network infrastructure is online and ready for work. Features like High Availability (HA) is fully supported, as well as Fast Route Failover technologies and link aggregation, which ensures that your business is not affected by network downtime caused by link failure or hardware problem. It also support flood protection technologies to increase uptime in case your network is subjected to a Denial-of-Service (DoS) attack.

Powerful Firewall

The Clavister X8 is a next-generation firewall, but it also has all the traditional security features, such as stateful firewall with deep-packet inspection, and it is powered by our own in-house developed network security operating system, the Clavister cOS Core. As well as providing all traditional firewall functions, such as port blocking and proxy server, all Clavister firewall solutions incorporate next-generation firewall features to detect and block sophisticated application-level attacks. This means higher level of security, higher traffic throughput and minimal use of system resources.

Performance

Clavister X8 provides next-generation security services across all points of your network without sacrificing performance throughput. Purpose-built hardware running on our highly efficient network security operating system ensures that the firewall performance throughput is one of the highest in the industry, making sure that your Clavister firewall will not be a bottleneck in your network infrastructure.

Simplicity

We strive to make things easy to understand and easy to use. This includes everything from hardware design to security management. We build highly customizable enterprise-grade firewalls, and despite the inherent complexity, we make an effort of making it easy to use. For example, our highly acclaimed centralized security management system, Clavister InControl uses color-coded attribute groups to provide a clear overview over dependencies that the firewall rules have to each other, making human errors less likely to occur. By combining policies and services into one, firewall policy management can be simplified and more easy to use. This results in fewer policy rules, making it easier to manage and less likely to cause a security breach.

All-Inclusive Security Management

For any network, security management is one of the more important aspects. It has to be intuitive, efficient and easy to use For large enterprises, with multiple firewalls at multiple sites, and even in geographical disperse areas, keeping your security management consistent and cohesive, and up to date is a non-trivial task. All these security management systems are included with our Clavister cOS Core products – free of charge.

Clavister InControl - Centralized Security Management

Clavister InControl offers a comprehensive centralized management solution that will assist and help administrators perform their daily tasks faster, easier and in a more streamlined way. Its intuitive user interface and support for task-driven workflow management guides administrators through complex and repetitive tasks, thereby alleviating the burden of managing large installations. With support for triple-AAA (Authentication, Authorization and Audit) the integrity and configurations managed by the Clavister InControl system is kept under strict control. This level of control makes it easy to use delegated manage-

ment, allowing specific teams and personnel to access only designated parts of the system.

Clavister InControl can be extended to collaborate with a vast number of other management system with the use of Clavister InControl Software Development Kit (SDK). The Clavister InControl SDK enables organizations to integrate and extend existing system management tools with Clavister InControl management. For example, optimized provisioning systems, integrated help desk functionality.

Splunk for Clavister

Splunk for Clavister cOS Core is a comprehensive Webbased reporting system that offers enterprise-level reporting with tight integration with all Clavister cOS Core-based products. Splunk supports real-time data analysis, with Key Performance Indicators (KPI), graphs, tables and long-term trending, scaling from a single Clavister security gateway to large data centers.

The Splunk for Clavister cOS Core enables you to visualize your Clavister security solution, including pinpointing problem areas, thwarted attacks and other security issues, and then turn them into business-level reports. You can also take advantage of the built-in scheduling and distribution features to make sure the right people get the right reports on time.

Other Management Options

In addition to our centralized management solution, we also provide the Clavister Web Management system, an easy-to-use Web-based security management solution that works for smaller installations with just a few firewalls. Each product also supports our comprehensive command-line interface (CLI), enabling you to script common tasks.

The state of the s

Next-Generation Firewall Security

By integrating world-class Next-Generation Firewall functionality, such as our Clavister True Application Control, Intrusion Detection and Prevention (IDP), Anti-Virus, Anti-Spam and Web Content Filtering with a stateful firewall with deep packet inspection, IPsec and SSL VPN connectivity, we are able to protect your organization against everything from network layer attacks to application layer threats, and even viruses and worms. While you have full control of who does what, when and with what.

Clavister cOS Core

Clavister cOS Core is our in-house developed, high-performance security network operating system. Every line of code is carefully crafted to ensure that it delivers maximum performance at all times. We take pride in delivering a product that we have full control over, rather than a mashup of open-source components.

Flexibility and Adaptability

Not all networks are created equally. Vast differences in network topology and configuration require a network security gateway to be able to accommodate all these differences. Our security gateways gives you the freedom to set routing policies with extreme granularity. A large number of parameters can be used to construct policies and rules to meet even the most demanding network installation.

Big on Performance - Low on Maintenance

All Clavister security gateways share a common trait: they all support Clavister Service Provisioning Network (CSPN). This secure, high-speed network ensures that all Clavister Security Subscription services are kept updated and current from newly emerging threats. This gives system administrators the freedom to concentrate on running their network without having to worry about having the latest security patches installed.

License Scalability

One important aspect of our products is scalability. Our licensing model offers you the ability to start with your performance needs today and upgrade your product incrementally as your organization grows. You also have the choice of two subscriptions models: the Clavister Security Subscription, our all-inclusive subscription, or the regular Clavister Product Subscription.

Low Total Cost of Ownership

Our goal is to provide a complete security solution that is more cost efficient than our competitors. Clavister security gateways, with their unique set of integrated security features, world-class service and support, and their powerful administration system, enables you to spend less time managing your security environment and keep your network defenses up to date, and thereby lower your network security infrastructure TCO significantly.

Performance* and Capacity	Clavister X8	Clavister X8 Pro
Firewall Performance (plaintext throughput)	1 Gbps	2 Gbps
IPsec VPN Performance (large packets)	70 Mbps	140 Mbps
Maximum Concurrent Connections	100,000	200,000
Maximum Concurrent IPsec VPN Tunnels	100	250
Maximum Concurrent L2TP/PPTP/SSL VPN Tunnels	100	250
Maximum Number of Users	Unrestricted	Unrestricted
Maximum Number of Routing Tables (Virtual Routers)	5	10
Connectivity	Clavister X8	Clavister X8 Pro
Ethernet Interfaces	4 x 1GbE (RJ45)	4 x 1GbE (RJ45)
Interfaces for Management / High Availability (HA)	Configurable	Configurable
Configurable Internal / External / DMZ Ports	Yes	Yes
Local Console Port	Serial Console – DB9	Serial Console – DB9
Link Aggregation IEEE 802.1AX-2008 (Static/LACP)	Yes	Yes
Maximum Number of VLAN Interfaces IEEE 802.1Q	128	256
Support for High Availability (HA)**	Yes	Yes
Service-VLAN Interfaces IEEE 802.1ad (Q-in-Q)	Yes	Yes
Product Specific Specification		
Form Factor	Industrial DIN-mount	
Dimensions (height x width x depth)	170 mm \times 60 mm \times 126 mm (6.69 in \times 2.36 in \times 4.96 in) without DIN-mount 170 mm \times 60 mm \times 147 mm (6.69 in \times 2.36 in \times 5.79 in) with DIN-mount	
Rack Mountable	No	
Hardware Weight / Package Weight	1,2 kg (2.65 lb) / 1,8 kg (3,97 lb)	
Power Specifications		
Power Supply (AC) / PSU Rated Power (W)	100-240VAC, 50-60 Hz / 60 W	
Average Power Consumption / Redundant PSU	21 W / 78 BTU / No	
Appliance Input	+12V DC (5A) to +36V DC (1.5A)	
Environmental		
Cooling / Humidity	Passive cooling, no moving parts / 5% to 95% non-condensing	
Operational Temperature	-20° to 55° C (-4° to 131° F)	
Vibration / Shock	0.41 Grms2 (3-500 Hz) / 30 G	

^{*} Performance based on Clavister cOS Core 11.00.

Where to Buy Clavister

For more information about where to buy Clavister products, visit www.clavister.com/partners. Additional resources and customer testimonials can be found at www.clavister.com/partners.

All Clavister Lynx Series products include a two (2) years standard RMA warranty.

^{**} When using High Availability clusters, the hardware settings for each interface must be identical on both cluster nodes (bus, slot and port)

Product Features

Firewall

Firewall		
Stateful Firewall / Deep Packet Inspection	Yes / Yes	
IP Policies	ALLOW, DROP and REJECT	
Multiple IP Rule Sets	Yes	
User- and Group-Based Policies	Yes	
Scheduled Policies	Yes	
DoS and DDoS Detection and Prevention		
	Yes	
Threshold Rules (Connection Count and Rate Limits)	Yes	
IP Blacklisting / Whitelisting	Yes / Yes	
TCP Sequence Number Tracking	Yes	
FQDN Address Filter in IP Policies	Yes	
IP Geolocation Filter in IP Policies	Yes	
Ingress Filtering / IP Spoofing Protection		
Access Rules	Yes	
Strict Reverse Path Forwarding (RPF)	Yes	
Feasible RPF by using Interface Equivalence	Yes	
Address and Port Translation	100	
	Von	
Policy-Based	Yes	
Dynamic NAT (Source)	Yes	
Symmetric NAT	Yes	
NAT Pools	Yes	
Static Source Translation	Yes	
Static Destination Translation (Virtual IP/Port Forward)	Yes	
NAT Hairpinning	Yes	
Server Load Balancing (SLB)		
SLB Distribution Methods	Round-Robin, Connection-Rate	
SLB Monitoring Methods	ICMP Echo, Custom TCP Port, HTTP Request/Response	
SLB Server Stickiness	State, IP Address, Network	
	State, II Address, Network	
Mode of Operations	V	
Transparent Mode (Layer 2)	Yes	
Routing Mode (Layer 3)	Yes	
Mixed Transparent and Routing Mode	Yes	
Routing		
Static Routing	Yes	
Policy-Based Routing (PBR)	Yes	
Scheduled Policy-Based Routing	Yes	
Virtual Routing	Yes	
Multiple Routing Tables	Yes	
Loopback Interfaces	Yes	
Route Load Balancing (Equal-Cost Multipath)	Yes	
Route Failover		
	Yes	
Route Monitoring Methods	ARP, ICMP Echo, Custom TCP Port, HTTP Request/Response	
Source-Based Routing	Yes	
Path MTU Discovery	Yes	
Dynamic Routing		
Policy-Based Dynamic Routes	Yes	
OSPFv2 Routing Process (RFC2328)	Yes, multiple	
OSPFv2 RFC1583 Compatibility Mode	Yes	
OSPFv2 over VPN	Yes	
Multicast		
Multicast Forwarding	Yes	
-		
IGMPv2 Compatibility Mode (RFC2236)	Yes	
IGMPv3 (RFC3376)	Yes	
IGMP Proxy Mode	Yes	
IGMP Snoop Mode	Yes	
Transparent Mode (L2 Bridge Mode)		
Policy-Based	Yes	
MPLS Pass-through	Yes	
DHCP Pass-through	Yes	
Layer 2 Pass-through of Non-IP Protocols	Yes	
Spanning Tree BPDU Relaying	Normal (STP), Rapid (RSTP), Multiple (MSTP), Per VLAN Spanning Tree Plus (PVST+)	
	Homica (OT), Frapia (FROT), Malapia (MOT), For VEAN Spalling That Flas (FVST+)	
IP Address Assignment	V.	
Per Interface Address Assignment	Yes	
Static	Yes	

DHCP Client	Ethernet, VLAN, Link-Aggregation	
PPPoE Client	Ethernet, VLAN, Link-Aggregation	
PPTP/L2TP Client	Yes	
Network Services		
DHCP Server	Yes, multiple	
DHCP Server Custom Options	Yes	
DHCP Relay	Yes, multiple	
IP Pool	Yes	
Proxy ARP	Yes	
Dynamic DNS Services	DynDNS.org, Dyns.cx, CJB.net, Peanut Hull	
Custom HTTP Poster	Yes	
Bandwidth Management		
Policy-Based Bandwidth Management	Yes	
Scheduled Policies	Yes	
Bandwidth Guarantees / Limits / Prioritization	Yes / Yes	
DSCP- / ToS-Based	Yes	
Bandwidth Management per Group	Yes	
Dynamic Bandwidth Balancing between Groups	Yes	
Packet Rate Limits	Yes	
DSCP Forwarding	Yes	
DSCP Copy to Outer Header	VLAN, IPsec	
Application Control		
Recognizable Applications	< 2,000	
Recognition of SSL Based Applications	Yes	
Application Content Control	2,400	
Policy-Based	Yes	
Policy Matching on Application	Yes	
Policy Matching on Application Content (Metadata)	Yes

Tunnel Selection Through	Firewall Rule Set, Routing, Policy-Based Routing	
User Authentication	Very market	
Local User Database	Yes, multiple	
RADIUS Authentication	Yes, multiple servers	
RADIUS Accounting	Yes, multiple servers	
LDAP Authentication	Yes, multiple servers	
RADIUS Authentication Protocols	PAP, CHAP, MS-CHAPV1, MS-CHAPV2	
XAUTH IKE/IPsec Authentication	Yes	
Web-Based HTTP/HTTPS Authentication	Yes	
Configurable HTTP/HTTPS Front-End	Yes	
L2TP/PPTP/SSL VPN Authentication	Yes	
Single Sign-On		
Device-Based Authentication (MAC Address)	Yes	
ARP Authentication	Yes	
RADIUS Relay	Yes	
Active Directory Integration	Microsoft Windows Server 2003, 2008 R2, 2012	
Client-less Deployment	Yes	
Client Support	iOS, Android, Windows, OSX, Linux	
Security Management		
Centralized Management	Clavister InControl ¹	
Web User Interface (WebUI)	HTTP and HTTPS	
SSH / SCP Management	Yes / Yes	
Command Line Interface (CLI)	Yes	
Management Authentication	Local User Database, RADIUS	
Remote Fail-Safe Configuration	Yes	
Local Console (RS-232)	Yes	
Traffic Simulation (CLI)	ICMP, TCP, UDP	
Scripting	CLI, WebUI	
Packet Capture (PCAP)	Yes	
System Upgrade	SSH / WebUI / Clavister InControl. From version 9.00.01 and later.	
System and Configuration Backup	SSH / WebUI / Clavister InControl	
SNTP Time Sync	Yes	
Monitoring		
Syslog	Yes, multiple servers	
Clavister Log	Yes, multiple servers	
Real-Time Log	WebUI, Clavister InControl	
Mail Alerting	Yes	
Log Settings per Policy	Yes	
	Yes	
Log Export via WebUI SNIMD(2) Polling / SNIMD(2) Traps	Yes Yes	
SNMPv2c Polling / SNMPv2c Traps Page Time Mapiter Alexte (Leg Action)		
Real-Time Monitor Alerts (Log Action)	Yes	
Real-Time Performance Monitoring	WebUI, Clavister InControl	
Hardware Key Metrics Monitoring	CPU Load, CPU Temperature, Voltage, Memory, Fan, etc.	
	r Clavister firewalls. These monitoring plug-ins are either commercially available or via open source.	
IPv6		
IPv6 Ready Certification	Core Protocols, Phase-2 Router	
Neighbor Discovery	Yes	
Proxy Neighbor Discovery	Yes	
IPv6 Path MTU Discovery	Yes	
ICMPv6	Yes	
IPv6 Router Advertisement	Yes	
II VOTIOUIOI / GVOI II SOITICITE		

Interfaces	Yes	
Ethernet Interfaces	Yes	
VLAN Interfaces (802.1q)	Yes	
Link Aggregation IEEE 802.1AX-2008 (Static/LACP)	Yes	
Static IPv6 Address Assignment	Yes	
IPv6 DHCP Client	Yes	
Firewall		
IP Policies	ALLOW, DROP and REJECT	
Stateful Firewall	Yes	
Ingress Filtering	Yes	
IPv6 Routing / Policy-Based Routing	Yes / Yes	
Functionality		
DHCPv6 Server	Yes	
Application Control	Yes	
High Availability		
Active Mode with Passive Backup	Yes	
Firewall Connection State Synchronization	Yes	
IKE / IPsec State Synchronization	Yes / Yes	
User and Accounting State Synchronization	Yes	
DHCP Server and Relayer State Synchronization	Yes	
Synchronization of Dynamic Routes	Yes	
IGMP State Synchronization	Yes	
Server Load Balancing (SLB) State Synchronization	Yes	
Configuration Synchronization	Yes	
Device Failure Detection	Yes	
Dead Link / Gateway / Interface Detection	Yes / Yes / Yes	
Average Failover Time	< 800 ms

About Clavister

Clavister (NASDAQ: CLAV) is a leading security provider for fixed, mobile and virtual network environments. Its award-winning solutions give enterprises, cloud service providers and telecoms operators the highest levels of protection against threats, with unmatched reliability. Clavister's performance in the security sector was recognized with the Product Quality Leadership Award from Frost & Sullivan. The company was founded in Sweden in 1997, with its solutions available globally through its network of channel partners. To learn more, visit www.clavister.com.
